Summer 2 Week 1

KEEPING IN TOUCH

Year 6 News

Dear children and parents,

We hope you had a lovely half term and are now refreshed and ready for the week ahead.

Here is an outline of the work you will be doing:

English

This week we are going to start using the Talk for Writing units – children you will be familiar with using these in school. We are starting with an exciting unit called Doors – the World of Possibility. Your main piece of writing this week will be to write a poem called 'I opened the magic door and ...'

Work your way through the unit to get ideas and then really let your imaginations go. Try to have a verse for each of the senses –see Activity 2.

Make every word count in your poem and consider including some similes, metaphors and personification. It will take several sessions to produce your final piece. When you have finished your poem, self/peer assess using the success criteria and send to the email below by 8th June.

We have also added the SPAG FAST FIVE. This week Try to complete 1A, 1B and 1C this week. The answers have been included.

Maths

In maths we will be looking at the relationship between fractions, decimals and percentages. We will continue to use the White Rose planning for this. Watch the tutorials carefully.

Try to keep up with your I Can do Maths work.

We have also added daily FAST FIVE and answers – try to start each maths session with these like we do in class.

On Friday we have added a maths investigation. Please look at the activities on the website – you will need to explore all the possibilities of splitting a rectangle in half and creating tetrahedrons.

Other curriculum areas can be found by following the links on the timetable.

If you have any problems please contact us on the email below.

Have a good week.

Additional Ideas to Support Topic Work:

Geography

Revision - 8 Points of a compass
draw labelled compass

Link to maths revision on rotation - How many degrees in each turn - Practise rotating some different shapes using squared paper/tracing paper.

Find a map of the local area either at home or on the internet. Locate places at different point of the compass.
Draw map of an imaginary island

Draw place at different points of compass. Try to give directions to different places
Choose 5 map symbols to add to imaginary island map.

DT

How long can you make a marble run using different household objects. Take a photo and send it in. It would be great to see who can make the longest marble run

Science

The science of sport:

There is a lot more to sport than meets the eye and it is your job to explore the science behind it. Investigate and explore the grounds, the kit, the people, the physics and night time matches... and even reflect on your own sporting prowess !
