

Engineers R Us

An after school engineering club for those that ask “how?” and “why?” about our built environment; bringing STEM subjects to life.

Engineers R Us is founded and run by me, a Chartered Civil Engineer with more than 15 years' consultancy experience of designing buildings and bridges across the globe. In these sessions I will share my enthusiasm and experiences to bring **STEM** subjects to life and demonstrate their value in the engineering of the world around us. My sessions will look at different engineering sectors and largely focus on the built environment, exploring a wide range of themes using fun practical tasks to aid discovery, stimulate creativity and develop problem solving resilience. **Please visit my website for more information about my club.**

Venue: Cardinal Newman Catholic Primary School

Day, time & dates: Monday afterschool from 1525 to 1625 commencing 14th January 2019 with the last session on Monday 1st April 2019. Term time only.

Year group & Cost: KS2 children (Years 3 to 6), 11 sessions at £88 for the term. Places will be limited to 16 children.

How to book:

To secure your child's place please email me on engineersrus2018@yahoo.com with the following information:

- 1) Name of your School
- 2) Your child's full name, year group and class name,
- 3) Your contact details (mobile & email)

Please note, I will hold your child's initial space on a first come first email basis. I will then liaise with you by email to arrange payment and confirm your booking.

I look forward to seeing you soon!

Mr G Campetti
BEng(Hons) MSc CEng MICE
