---

---

## Background

For the last three years Mark has been touring his Spectacular Science Show at theatres up and down the UK. His fabulously fun, engaging and educational show has been seen by public audiences from Southampton to Inverness, at the Royal Institution in London and at the Edinburgh Fringe Festival. Now, thanks to sponsorship from Air Product Plc, he is bringing his show to schools in your area.

## About Spectacular Science Show

Mark's Spectacular Science Show lasts for one hour during which time, Mark will perform a variety of exciting science demonstrations to amaze and inspire the children. The experiments will cover such topics as chemical reactions, the bernoulli principle, science of flight, how rockets work and much more. As he performs the show, he will explain the science behind the experiments at a level appropriate for the audience to understand.

Thanks to the kind sponsorship from **Air Products Plc** the show is being offered to twenty primary schools in areas within the operational regions of Air Products Plc.

If your school is interested in Mark visiting your school to perform his show then please get in touch with Mark's Schools Team at [school\\_bookings@spectacularscienceshow.com](mailto:school_bookings@spectacularscienceshow.com)

## About Mark Thompson

Mark is an astronomer, broadcaster, author and all round science fan. At the age of ten he saw Saturn through a telescope which ignited a passion inside him, a passion that has grown steadily. Since those early days, Mark has inspired millions of viewers to get out and enjoy the night sky through his role as a presenter on the RTS nominated show BBC Stargazing Live. His passion for reaching out to a new audience has found him working on The One Show, the Alan Titchmarsh show, Channel 4 documentaries, This Morning and more recently on ITVs prime time breakfast show Good Morning Britain. He is also a regular face on BBC Breakfast and Five News and a regular voice on Radio Five Live.

When not working on TV or Radio shows, he is most likely to be writing about it having published four books with five more due for publication in 2019 or performing his sell out theatre show “Spectacular Science” at theaters up and down the country. Outside of his performing and writing work, Mark is keen to do his bit to help others. He is the patron for the Norwich Science Festival and Youth STEMM awards and an ambassador for Barnardo’s. The latter role has seen him brave arctic conditions and climb mountains to raise money and awareness for the great work the charity does.

In 2018 his local university, the University of East Anglia awarded Mark an honorary doctorate for his work in science outreach

## About Air Products Plc

Air Products touches the lives of consumers around the globe in positive ways every day.
